

Susan Myket, Ph.D. & Associates

A Child, Teen, & Family Psychology Practice

Full-Time/Part-Time Career Opportunity Psychologist, Post doc, or Ed.D

Susan Myket, Ph.D. & Associates, a psychology practice in Chicago's western suburbs, we see clients who have a variety of presenting problems, such as anxiety, depression, autism spectrum disorders, ADHD, OCD, oppositional defiance, adjustment to stressors, trauma, disordered eating, and learning disabilities. We offer individual therapy, assessment, groups, parent consultation, couples therapy, and community consultation. The practice is well-respected in the community, and clinicians quickly have a full caseload. Clinicians have dedicated offices, our billing company handles insurance and financial matters, and our intake department books initial appointments. Clients are most available after school, so therapists must be available to work weekday afternoons and some evenings. Saturdays or Sundays are available if desired, and could replace a weekday evening.

Minimum qualifications: Doctorate in psychology. CBT, ACT, and/or DBT focus; Child and Adolescent focus; plenty of experience providing therapy to children and adolescents. We expect our clinicians to be able to treat an 8-year-old with behavior issues, a 12-year-old with anxiety, and a 16-year-old with depression. Our clinicians also have specialty areas or ages in which they excel - we are able to tailor a majority of a doctor's client load to meet preferences and areas of expertise.

Myket & Associates Benefits:

- 401(k)
- 401(k) matching
- Dental insurance
- Health insurance
- Paid time off
- Professional development assistance
- Competitive Salary or Hourly compensation
- Quality supervision/peer consultation
- Warm interactive practice, where clinicians often work with different family members together.
