A Child, Teen & Family Psychology Practice

## **Ideal Applicant**

**Susan Myket, Ph.D. & Associates** is a thriving clinical psychology practice in Chicago's western suburbs. As a child, teen, and family psychology practice, we see clients who have a variety of presenting problems such as anxiety, depression, autism spectrum disorders, ADHD, OCD, oppositional defiance, adjustment to stressors, disordered eating, and learning disabilities. Our specialists work together to support six specialty clinics: Anxiety, Assessment, Autism Spectrum, Early Childhood, Health Psychology, and Pediatric Psychology. Students will provide individual therapy and psychological assessments and may have the opportunity to provide family and group therapy. Applicants must be interested in working weekday afternoons and evenings.

**Our Ideal Applicant** has a Master's degree and is working on their Doctorate in psychology. They have a broad understanding of and experience in providing research-supported therapies to children, adolescents, and families, with an emphasis on Cognitive Behavioral Therapy. Candidates should also have some experience implementing (or a strong textbook understanding of) Dialectical Behavior Therapy, and/or Acceptance and Commitment Therapy. Completion of a child & adolescent diagnostic assessment externship is expected from our Advanced Applicants. We expect our students to be able to treat an 8-year old with behavior issues, a 12-year old with anxiety, and a 15-year old with depression.

Our students must be self-motivated, organized, and independent workers who are curious, flexible, and comfortable viewing themselves as contributing members of our team. They must be interested in working with intense, high SES families with high performance expectations.

A Child, Teen & Family Psychology Practice

## **Supervision Philosophy**

**Susan Myket, Ph.D. & Associates** follows the supervision requirements for obtaining an Illinois Clinical Psychologist License and works with each school to meet their program-specific supervision requirements. Weekly supervision is provided by a licensed clinical psychologist. Our practice also provides a weekly group supervision and didactic training, which is an opportunity for all clinicians to continue to grow their clinical skills and share knowledge with one another. We may provide more than one supervisor over the course of the year, so the student can learn how to treat from a variety of perspectives. Our supervision philosophy is collaborative. We review each intake client and collaborate on a treatment plan, with the student taking the lead and seeking support and advice on adjustments to the plan as appropriate throughout a client's care. Once the student has an established client load, supervision will be spent doing a quick check-in on each client as needed and then the student will bring challenging/growth cases or issues to discuss. We have an open-door policy and encourage students to seek in-the-moment advice from any of our clinicians in the practice who may have expertise on a certain concern or type of client. We also provide our students supervision & training on insurance coding and the financial aspects of a private practice.
