Susan Myket, Ph.D. & Associates

A Child, Teen, & Family Psychology Practice

Specialty Clinics: Anxiety, Assessment, Autism Spectrum, Early Childhood, and Pediatric Psychology. Students work with licensed psychologists to provide psychological and neuropsychological assessments to individuals. Our Ideal Applicant has a Master's degree and is working on their Doctorate in Psychology or a related field. They have broad understanding of research-supported assessments and therapies to children, adolescents, and families. Our students must be self-motivated, organized, and independent workers who are curious, flexible, and comfortable viewing themselves as contributing members of our team. They must be interested in working with intense, high SES families with high-performance expectations.

Supervision Philosophy: Susan Myket, Ph.D. & Associates follows the supervision requirements for obtaining an Illinois Clinical Psychologist License and works with each school to meet their program-specific supervision requirements. Weekly supervision is provided by a Licensed Clinical Psychologist. Our practice also provides weekly group supervision and didactic training, which is an opportunity for all clinicians to continue to grow their clinical skills and share knowledge with one another. Our supervision philosophy is collaborative. We review each intake client and collaborate on a treatment plan. We have an open-door policy and encourage students to seek in-the-moment advice from any of our clinicians in the practice who may have expertise on a certain concern or type of client. We also provide our students supervision & training on insurance coding and the financial aspects of a private practice.

Thank you.
